PROFILE

Senior Endpoint Engineer with 7+ years of experience designing, deploying, and supporting Modern Workplace solutions across enterprise environments. Experienced in Microsoft Intune, Microsoft Entra ID, Microsoft Autopilot, Jamf Pro, and Microsoft 365, managing 5,000+ Windows and macOS endpoints across global organizations including PayPal and ICON plc. Skilled in endpoint lifecycle management, cloud-managed device provisioning, compliance policies, application deployment, endpoint security, and L3 escalation support. Strong experience in Modern Desktop operations, enterprise device management, stakeholder collaboration, and delivering secure, scalable endpoint solutions aligned with Microsoft best practices.

PROFESSIONAL EXPERIENCE

Principal Infrastructure Engineer - EUC Engineering

2026 Aug – Present | Bangalore

Mphasis | Software Engineer III – Wells Fargo Client

- Engineering and implementing enterprise Endpoint and End User Computing (EUC) solutions across Windows, macOS, iOS, and Android environments.
- Managing the complete endpoint device lifecycle, including hardware evaluation, persona-based device selection, procurement, provisioning, deployment, standardization, and operational handover.
- Designing and implementing Microsoft Intune and Windows Autopilot solutions for zero-touch device enrollment, provisioning, configuration, and deployment.
- Performing Windows OS engineering, including enterprise OS builds, device drivers, BIOS/firmware configuration, hardware compatibility, and endpoint standardization.
- Developing and implementing endpoint configurations using Microsoft Intune Configuration Profiles, Windows CSPs, security policies, compliance policies, and enrollment workflows.
- Engineering application packaging and deployment using Microsoft Intune Win32 applications, including application requirements, detection rules, dependencies, supersedence, and deployment workflows.
- Working with Jamf and Apple Business Manager for macOS and iOS device management, including PKG/DMG application deployment, VPP application distribution, and Automated Device Enrollment.
- Supporting Azure Virtual Desktop (AVD) environments and managing endpoint configurations and applications across virtual and physical Windows devices.
- Supporting Citrix environments and troubleshooting user-session, application, connectivity, and endpoint-related issues.
- Developing PowerShell automation and utilizing Microsoft Graph API to improve endpoint deployment, configuration, validation, and management workflows.
- Researching new technologies and engineering solutions, troubleshooting complex endpoint issues, performing root-cause analysis, and developing scalable solutions.
- Working within Agile/Scrum delivery models using Jira and Confluence, participating in sprint planning, user-story creation, prioritization, technical discussions, and solution delivery.
- Collaborating with Operations teams to transition engineered endpoint solutions into production and ongoing support.

IT Analyst | Team Leader – Desktop Support Engineering

2024 Mar – 2026 Aug | Bangalore

TCS – Tata Consultancy Services | Client – PayPal

- Managed enterprise Windows and macOS endpoints using Microsoft Intune, Microsoft Autopilot, and Jamf Pro, supporting secure endpoint provisioning and lifecycle management.
- Administered Windows Autopilot for zero-touch provisioning, enrollment, and secure onboarding of enterprise devices.
- Managed the complete endpoint lifecycle, including provisioning, application deployment, policy management, patching, compliance, and device retirement.
- Served as a Tier 3 escalation engineer for complex endpoint, enrollment, policy deployment, application, and operating system issues.

- Implemented and supported endpoint security technologies including BitLocker, Microsoft Defender, Conditional Access, and compliance policies.
- Managed Windows Update rings, feature updates, and quality updates across enterprise environments using Microsoft Intune.
- Packaged, deployed, and troubleshoot Win32, Microsoft Store, and line-of-business applications through Microsoft Intune.

IT Support Engineer II | IT Digital Operations – EUC
2019 Dec – 2024 Mar | Thiruvananthapuram

ICON PLC (ICON Clinical Research India)

- Delivered enterprise L2/L3 endpoint support for over 5,000 Windows and macOS devices across regulated corporate environments.
- Managed enterprise endpoints using Microsoft Intune, Microsoft Autopilot, Jamf Pro, SCCM, Altiris, and Nexthink, supporting device provisioning, imaging, application deployment, endpoint monitoring, patch management, and lifecycle operations.
- Deployed and maintained Microsoft Intune configuration profiles, compliance policies, endpoint security baselines, and Windows Update rings to ensure secure and compliant devices.
- Supported Windows Autopilot enrollment and provisioning, enabling secure zero-touch onboarding for enterprise users.
- Provided Tier 3 support for complex endpoint issues involving device enrollment, policy deployment, application installation, authentication, and operating system troubleshooting.
- Administered Active Directory and Microsoft Entra ID user management, Group Policy, authentication, and access-related issues.

Retainer Engineer / Technical Support Engineer
2018 Oct – 2019 Dec | Ernakulam

AFORESERVE.COM LTD

- Delivered Level 1 technical support to end-users on hardware, software, and network issues, providing timely and effective resolutions.
- Assisted in device deployments, software application setups, and basic network configurations.
- Maintained accurate service logs and escalated complex incidents to senior engineers per ITSM guidelines.

EDUCATION

Diploma- Computer Engineering
2014 May – 2018 May

N. S. S. Polytechnic College, Pandalam
Pandalam, Pathanamthitta

Higher Secondary (+2), Stream: Science
2011 – 2013

Board: Kerala State Board

SOFT SKILLS:

- Problem Solving & Critical Thinking
- Communication & Collaboration
- Time Management & Prioritization
- Process Improvement
- Vendor Management
- Mentoring and Knowledge Sharing
- Vendor & Stakeholder Management
- Customer Obsession

TECHNICAL SKILLS

- **Operating Systems & Platforms:** Windows 10/11, Windows Server, macOS, iOS, Android
- **Endpoint Management & Modern Workplace:** Microsoft Intune, Microsoft Autopilot, Jamf Pro, Endpoint Lifecycle Management, Device Provisioning, Device Enrollment, Endpoint Compliance, Configuration Profiles
- **Application Management:** Win32 Deployment, Microsoft Store Apps, LOB, Application Lifecycle Management
- **IT Support & Endpoint Operations:** L2/L3 Support, Endpoint Troubleshooting, Incident Management, SLA
- **Cloud & Identity Management:** Microsoft 365, Microsoft Entra ID , Active Directory, MFA, Conditional Access
- **Security & Endpoint Protection:** Microsoft Defender, BitLocker, Compliance Policies, Security Baselines,
- **Patching & Device Maintenance:** Windows & macOS Patching, Endpoint Updates, Vulnerability Remediation
- **Digital Workplace & Collaboration:** Microsoft Teams, Zoom, Webex, AV Systems
- **ITSM & Monitoring:** ServiceNow, Nexthink, Confluence
- **Networking Fundamentals:** VPN, DNS, DHCP, LAN/WAN, Wi-Fi Troubleshooting
- **Vendor & Asset Management:** Procurement, Inventory Management, Hardware Lifecycle Management
